

The diagram illustrates the machine learning workflow. A horizontal bar is divided into two sections: 'Train' on the left and 'Validation' on the right. A curved arrow originates from the 'Train' section and points to the 'Validation' section, representing the model training and evaluation process. Below the 'Validation' section, a curly bracket spans its width, with the text 'Model Selection' centered underneath it, indicating that the validation set is used for selecting the best model.
